PROFESSIONAL SUMMARY

Adaptable full-stack developer with 5+ years of experience and a proven track record of quickly learning new technologies. Specializes in full-stack development and cloud-based solutions, with expertise in React.js, Vue.js, Node.js, and AWS services. Excels in developing SaaS products, optimizing web applications, and working on greenfield projects. Combines technical proficiency with a passion for learning, consistently seeking opportunities to expand skills and tackle complex challenges.

WORK EXPERIENCE

Adsum

Software Engineer

Jul 2022 – Sep 2023

London, UK (Remote)

- Developed an automated custom KYC flow using [Veriff](#), enabling user identity and document verification without human intervention, applicable on both web and mobile platforms.
- Implemented the entire front end from scratch, including multiple onboarding flows for different use cases, user dashboards, tax reclaim, status pages, and a chat interface for our [Tax AI](#) bot.
- Deployed the front end using a custom build pipeline through Flask API, facilitating the migration of old HTML pages to the new front end without disrupting the user experience.

Skills: React.js, Next.js, Material UI, TypeScript, Python, Flask

SKOOT

Front-End Developer

Dec 2021 – May 2022

London, UK (Remote)

- Developed a UI component library based on Figma designs with over 50 reusable components using Vue.js, enhancing development efficiency and design consistency across the platform.
- Created responsive and accessible web pages, including login, onboarding, dashboard, user profile, and payment, based on a [Micro-Frontend Architecture](#). Used GraphQL API to fetch and mutate user data.
- Integrated checkout.com for payments, Formik for form validations, and Hugo to generate a static site - improving the marketing website's performance and SEO.

Skills: Vue.js, Nuxt.js, TailwindCSS, Storybook, TypeScript, GraphQL, Hugo

Magnet Brains

Web Developer

Jan 2019 – Dec 2019

Bhopal, India (On-site)

- Worked on the [Pabbly Email Marketing](#) platform and led the development of the [Email Automation](#) project, enabling users to automate their email campaigns based on custom triggers and actions.
- Migrated data of over 1,000 users from the old automation system to the new one with zero downtime, ensuring a smooth transition and improved user workflows.
- Optimized MySQL queries and introduced Composer for dependency management, reducing API data fetching speed by up to 10 times and decreasing server load by 50%.

Skills: PHP, CodeIgniter, HTML, CSS, JavaScript, jQuery, Bootstrap, MySQL, Redis

Magnet Brains

Web Developer Intern

Nov 2018 – Dec 2018

Bhopal, India (On-site)

- Competed with 30 interns in a 2-month internship program and secured a full-time position by completing all challenges on time and with high quality.
- Wrote a PHP script to check email reputation that can call over 50 APIs in parallel and fetch data in just a few seconds, compared to an old script that took over 3 minutes.

Skills: PHP, CodeIgniter, HTML, CSS, JavaScript, jQuery, Bootstrap, MySQL

SAAS PROJECTS

ImgAlly [↗](#)

Mar 2024 – May 2024

- ImgAlly is an AI-based image generation and editing tool.
- It uses an AI model API by HuggingFace and features a user-friendly interface.

Front-End: React.js, Next.js, TypeScript, TailwindCSS

Back-End: Node.js, TypeScript, Serverless

AWS Services: S3, Lambda, API Gateway, Cognito, DynamoDB, CloudFront

AutomateMyApp [↗](#)

Jan 2021 – Sep 2021

- An automation service to connect apps and create workflows using a drag-and-drop interface.
- It supports many popular services like Gmail, Google Sheets, Calendly, and Discord.

Front-End: Vue.js, Vite, TypeScript, Bootstrap

Back-End: Node.js, Nest.js, TypeScript, Jest, PostgreSQL, PM2

AWS Services: EC2, S3, SES, CloudFront, CodeDeploy, ACM

Clearalist [↗](#)

Jan 2020 – Dec 2020

- An Email List cleaning service that allows users to upload emails in CSV files and verify them.
- It uses Telnet and SMTP protocols to verify emails and has a 90% accuracy rate.

Front-End: Vue.js, JavaScript, Bootstrap

Back-End: Node.js, Express.js, JavaScript, Mocha, Chai, Supertest, MongoDB, PM2

AWS Services: EC2, S3, SES, SQS, CloudFront, CodeDeploy, ACM

EDUCATION

Rajiv Gandhi Proudyogiki Vishwavidyalaya [↗](#)

Bachelor of Engineering (Computer Science)

Jul 2013 – Jun 2017

Bhopal, India (On-site)

CERTIFICATES

IBM Training [↗](#)

Enterprise Application Development for Cloud Deployment (Java EE)

Oct 2016 – Oct 2016

Bhopal, India (On-site)

SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, HTML, CSS

Frameworks: React.js, Vue.js, Express.js, Next.js, Nuxt.js, Nest.js, CodeIgniter, Flask

Technologies: Node.js, Docker, Redis, Linux, Serverless

Libraries: Jest, Mocha, Material UI, TailwindCSS, Bootstrap, jQuery

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git, GitHub, Postman, Storybook, Nginx, PM2, SSH

AWS Services: EC2, S3, SQS, SES, ACM, CloudFront, API Gateway, DynamoDB, Lambda, Cognito, CodeDeploy

Others: REST API, GraphQL, OAuth, JWT, DNS, SSL

HOBBIES

Video Games, 3D Modelling, Movies, TV Shows, Anime, Hiking, Competitive Programming
