PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience building SaaS products and complex front-end applications, specializing in JavaScript, TypeScript, React, Vue.js, Node.js, and AWS. I thrive in environments where I can take ownership of entire projects, from architecture to deployment. Passionate about writing clean, efficient, and maintainable code while consistently delivering ahead of deadlines. Eager to contribute to cross-functional teams that value continuous learning, teaching, and adopting new technologies.

WORK EXPERIENCE

Adsum-Works
London, UK
Front-End Developer (Remote)
Jul 2022 - Sep 2023

- **Reengineered the front-end architecture** from legacy HTML/JavaScript to a modern React and Next.js stack, significantly improving code maintainability and scalability.
- **Developed a custom KYC flow** integrating Veriff's API, enhancing user verification and experience. Also delivered the TaxAI chatbot interface within a week, enabling AI-driven tax query interactions.
- **Built a comprehensive UI component library** with over 100 components based on Atomic Design Principles, collaborating closely with the UI/UX designer to ensure design consistency and efficiency.
- **Consistently recognized by the team and CEO** for delivering projects ahead of schedule and demonstrating exceptional work ethic in a fast-paced startup environment.

Skills: TypeScript, React, Next.js, Python, Flask, REST, Storybook, Material UI

SkootEco
London, UK
Front-End Developer (Remote)
Dec 2021 - May 2022

- **Developed a centralized UI component library** using Vue.js and Nuxt.js, creating over 50 reusable components that streamlined development across multiple projects and ensured consistent design.
- **Implemented Storybook** to facilitate seamless collaboration between developers and designers, enhancing component development workflow and reducing design discrepancies.
- **Built and optimized micro-frontend web pages**, including critical user flows like login, signup, dashboard, and onboarding, ensuring high performance, responsiveness, and accessibility across devices.
- **Collaborated closely with cross-functional teams**, including product managers and lead developers, to deliver features ahead of schedule while maintaining high code quality and adhering to best practices.

Skills: TypeScript, Vue.js, Nuxt.js, GraphQL, Storybook, Tailwind CSS, CircleCI

AutomateMyApp
Bhopal, India
Founder, and Full-Stack Developer
Jan 2021 - Sep 2021

- **Designed and launched a Workflow Automation service** similar to Zapier, enabling users to connect apps like Google Sheets, Calendly, and Discord through a custom no-code workflow builder.
- **Developed the full-stack application** using Vue.js, Node.js, and Nest.js, focusing on scalability and security, deploying the service on AWS, and managing data with PostgreSQL.
- **Implemented JWT and OAuth-based authentication**, allowing users to access the service securely using their email or social accounts.
- **Integrated a subscription-based payment model** with PayPal, facilitating user monetization and ensuring a smooth transaction experience.

Skills: TypeScript, Vue.js, Vite, Node.js, Nest.js, REST, PostgreSQL, AWS, Bootstrap

Clearalist   Bhopal, India
Founder, and Full-Stack Developer   *Jan 2020 - Dec 2020*

- **Created and launched an Email List Cleaning and Verification service**, enabling users to upload and verify email lists, serving thousands of users and verifying over 5 million emails.
- **Developed the platform's front-end and back-end** using Vue.js, Node.js, and Express.js, with MongoDB for data management and AWS for cloud deployment, ensuring a reliable and scalable service.
- **Automated end-to-end testing for all API routes**, significantly reducing the risk of bugs and accelerating development with confidence.
- **Leveraged AWS SQS to handle multiple list cleaning jobs**, processing one CSV file serially to ensure accuracy and efficiency, even under high load.

Skills: JavaScript, Express.js, Vue.js, Node.js, REST, MongoDB, AWS, Bootstrap

Pabbly   Bhopal, India
Web Developer   *Jan 2019 - Dec 2019*

- **Developed the new Email Automation module**, significantly enhancing platform capabilities and user experience, drawing inspiration from industry leaders like MailerLite.
- **Led the migration of users** from an old automation system to the new one, ensuring zero downtime during the MySQL data transformation process.
- **Introduced Composer for PHP dependency management**, replacing outdated manual installations, which streamlined updates and maintained a consistent codebase.
- **Optimized API calls and MySQL queries**, thus reducing API call time from 12 seconds to 1 second and cutting server load by 50%.

Skills: PHP, CodeIgniter, JavaScript, REST, MySQL, HTML, CSS, Bootstrap

EDUCATION

Rajiv Gandhi Proudyogiki Vishwavidyalaya   Bhopal, India
B.E. - Computer Science & Engineering   *Jul 2013 - Jun 2017*

SKILLS

Languages: JavaScript, TypeScript, PHP

Front-End: React, Vue.js, Vite, Next.js, Nuxt.js

Back-End: Node.js, Express.js, Nest.js, Serverless, Flask

Testing: Jest, Mocha, Chai, Supertest

Databases: MySQL, PostgreSQL, MongoDB

Design Systems: Material UI, Tailwind CSS, Bootstrap

Tools: Git, NPM, Docker, Linux, Storybook, Nginx, Webpack, Babel

Others: REST, GraphQL, OAuth, JWT, E2E Testing, CI/CD, Agile, Scrum

Cloud: AWS (EC2, S3, SQS, SES, Lambda, API Gateway, CloudFront, CodeDeploy, ACM, Cognito, CloudWatch)
