WORK EXPERIENCE

Front-End Developer (Remote)
Adsum

07/2022 - 09/2023   *London, UK*

Achievements

- Developed the entire front end using React, successfully migrating old pages and enhancing the overall user interface.
- Deployed the front-end application through a Flask API, ensuring seamless integration and optimal performance.
- Consistently delivered high-quality work ahead of deadlines, contributing to the efficiency and reliability of the platform.

Front-End Developer (Remote)
SKOOT

12/2021 - 05/2022   *London, UK*

Achievements

- Developed 4 mini-projects, leveraging a micro-frontend architecture to enhance modularity and scalability.
- Constructed a UI library comprising more than 50 VueJS components, aligning with Figma designs.
- Successfully integrated checkout.com for payments in 2 projects, streamlining the payment process.

Web Developer
Pabbly

01/2019 - 01/2020   *Bhopal, India*

Achievements

- Developed the Email Automation module, efficiently handling 1000+ users every 15 minutes.
- Optimized MySQL queries, resulting in a 10X improvement in API call speed and a 2X increase in email sending speed.
- Streamlined dependency management by removing outdated libraries and using Composer.

EDUCATION

Bachelor of Engineering (Computer Science)
IES College of Technology

08/2013 - 06/2017   *Bhopal, India*

SKILLS

JavaScript · TypeScript · HTML · CSS · ReactJS · VueJS · NodeJS · NextJS · NestJS · Material UI · Bootstrap · TailwindCSS · MySQL · PostgreSQL · MongoDB · AWS · Nginx · Docker · Git · Storybook · Data Structures · Algorithms

PERSONAL PROJECTS

AutomateMyApp (01/2021 - 09/2021)
- Developed and deployed the entire Workflow Automation service, seamlessly integrating 10+ popular services.
- Implemented webhook-based workflow triggers, resulting in a 90% reduction in API calls, optimizing system efficiency.
- Implemented an OAuth 2.0-based authentication system for all integrations, enhancing the overall user experience.

Clearalist (01/2020 - 12/2020)
- Developed and deployed the Email Verification service, verifying over 5 million emails within a six-month timeframe.
- Implemented an affiliate module, contributing to a 20% increase in sales attributed to affiliate members.
- Introduced automated integration testing with full coverage, resulting in a 2X increase in development speed.

Bulk Rename Utility (08/2020 - 08/2020)
- Developed a VueJS application enabling users to generate Python scripts for automated bulk file renaming.
- Implemented advanced renaming options tailored to specific use cases, enhancing the flexibility of the tool.
- Successfully deployed the single-page application on Heroku, ensuring accessibility to a wider audience.

Web Search Engine (02/2017 - 03/2017)
- Developed and deployed a web search engine using Java Enterprise Edition.
- Implemented Google's Page Rank algorithm for effective page ranking, enhancing the accuracy of search results.
- Incorporated automatic page discovery, enabling the search engine to crawl and index new pages dynamically.
